

Struck by a Car

If a child gets hit by a car:

- **Stay calm. Keep the child calm.**
- **Get help or send a bystander.**
- **Call 911 for your rescue squad**
- **Do not move the child or let the child move (unless there is risk of more danger).**
- **Check for breathing. (Enroll in a class on first aid to learn rescue breathing. It could be the difference between life and death.)**
- **Stop bleeding. Press down on wounds with your hand or clothing.**
- **Cover the child to help prevent shock**
